

Information Management - Governing Policy

1. Purpose of policy

1.1 This policy underpins information management best practice within the University. It outlines the principles for effective data, information, records and knowledge management throughout the information lifecycle, and the related authorities and responsibilities of staff.

1.2 This policy must be read in conjunction with the linked Data Management – Procedures, Disposal of Digitised Records – Procedures and Information and Records Management - Procedures.

2. Policy scope and application

2.1 This policy applies to all staff, consultants or contractors, and advisory boards working for or on behalf of the University.

3. Definitions

Refer to the University's Glossary of Terms for definitions as they specifically relate to policy documents.

4. Policy Statement

4.1 The University is committed to a culture of managing data, information, records and knowledge, regardless of storage location, as valuable information assets which are created, used, and shared effectively to advance the University's strategic priorities.

4.2 Information management underpins every aspect and every activity of University operations. Information management initiatives are guided by UniSC Executive and the Data Analytics and Information Management Advisory Committee.

4.3 The University identifies and assigns accountable Information Custodians to ensure information assets are managed in compliance with relevant legislation, standards, and policies throughout the information lifecycle.

5. Principles

5.1 The University's data, information, and records management processes reflect industry best practice and comply with relevant legislation and regulatory requirements.

5.2 The University's approach to data and information access is one of openness and transparency in carrying out its functions.

5.3 The University is committed to the responsible creation, collection, handling, use, retention and disposal of its information assets.

5.4 The University demonstrates a commitment to maintaining a robust information and cyber security environment.

5.5 The University manages all information assets in a manner that enables accountability and return of value.

5.6 University data and information management roles and responsibilities are clearly defined.

6. Authorities

The following authorities are delegated under this policy:
