

Higher Degrees by Research Scholarships - Awarding Guidelines

1. Purpose

The purpose of these guidelines is to transparently communicate to applicants the selection criteria and scoring matrix used to assess Higher Degree by Research (HDR) scholarships at the University of the Sunshine Coast (USC).

USC awards several HDR scholarships through competitive selection rounds each year. The opening and closing dates are published on the USC website.

Applicants are expected to refer to this document and to the relevant HDR scholarship advertisement on the USC website when preparing their application.

The HDR Scholarships Selection Panel will use these Guidelines to assess HDR scholarship applications.

2. Eligibility

To be considered for a scholarship, applicants must be accepted into a Higher Degrees by Research program at the University of the Sunshine Coast.

3. Selection

In the competitive selection process, USC may give priority to students who:

3.1 are enrolling in an HDR for the first time,

3.2 have not previously completed a Research Doctorate or equivalent,

3.3 have not previously completed a Research Masters degree or equivalent, unless intending to undertake a Research Doctorate,

3.4 have not previously held an Australian Postgraduate Award, Australian Postgraduate Award (Industry) or an Australian Government-funded Postgraduate Research Award (excluding an IPRS or International RTP Fees Offset Scholarship) previously unless it was terminated within six months of the commencement of benefits,

3.5 have not previously been awarded, or currently be in receipt of, a scholarship stipend or other scholarship designed to offset HDR fees.

3.6 Stipend recipients are expected to prioritise their study and enrol on a full-time basis. Part-time study will be considered on a case-by-case basis for exceptional circumstances such as medical reasons or carer's responsibilities. Part-time applicants may apply but will be required to change to full-time study load upon commencement of the scholarship unless exceptional circumstances can be demonstrated.

3.7 for Research Training Program (RTP) Stipend Scholarships, recipients must not be in receipt of an equivalent award, scholarship or salary related to their course of study that provides a benefit greater than 75% of the annual RTP stipend rate at the time of award. Income unrelated to the student's course of study or income received for the student's course of study but not for the purposes of supporting general living costs is not to be taken into account.

4. Criteria

Each selection criteria will be weighted according to the percentage listed. The scoring matrix used by the HDR scholarship selection panel can be downloaded under Appendix A of this document.
