

## COURSE OUTLINE

# ENS103 Earth's Surface Processes

**Course Coordinator:** Peter Davies (pdavies1@usc.edu.au) **School:** School of Science, Technology and Engineering

2022 | Semester 1

USC Sunshine Coast  
USC Moreton Bay  
USC Fraser Coast

**BLENDED  
LEARNING**

Most of your course is on campus but you may be able to do some components of this course online.

*Please go to the USC website for up to date information on the teaching sessions and campuses where this course is usually offered.*

## 1. What is this course about?

### 1.1. Description

Studies related to planet Earth impact most aspects of modern life. They are fundamental not only to the field of Earth Science but also to environmental science, ecology, environmental management and natural resource management. In this course you are introduced to the various environmental systems at the Earth's surface, including the lithosphere, hydrosphere, biosphere and atmosphere. This course emphasises problem solving by helping you develop scientific reasoning skills and apply them to the investigation of natural surficial environments.

### 1.2. How will this course be delivered?

ACTIVITY	HOURS	BEGINNING WEEK	FREQUENCY
<b>BLENDED LEARNING</b>			
<b>Learning materials</b> – Pre-recorded conceptual videos and associated activity	1hr	Week 1	13 times
<b>Laboratory 1</b> – On campus laboratory class	2hrs	Week 1	13 times

### 1.3. Course Topics

- The Earth System and Geological time
- Principles of stratigraphy
- Geological processes at Earth's surface
- Plate tectonics: fundamental concepts, focussing on plate margins
- Rocks and rock-forming minerals
- Geological evolution of the Sunshine Coast region
- Physical, geochemical and biological characteristics of sediments
- Soils: their formation, sampling and laboratory analysis

## 2. What level is this course?

100 Level (Introductory)

Engaging with discipline knowledge and skills at foundational level, broad application of knowledge and skills in familiar contexts and with support. Limited or no prerequisites. Normally, associated with the first full-time study year of an undergraduate program.

### 3. What is the unit value of this course?

12 units

### 4. How does this course contribute to my learning?

COURSE LEARNING OUTCOMES		GRADUATE QUALITIES
On successful completion of this course, you should be able to...		Completing these tasks successfully will contribute to you becoming...
1	Demonstrate and apply theoretical and practical knowledge of geological processes and principles to regional and global contexts	Knowledgeable
2	Use practical techniques and templates to collect and organise geological information e.g. observation, sampling, laboratory testing, recording	Knowledgeable
3	Solve problems in Earth Science by:Analysing and interpreting geological informationIntegrating findings to identify rocks and soils, and constructing geological histories supported by evidence, e.g. diagrams, maps, calculations, observations	Creative and critical thinker Empowered
4	Communicate in scientific writing (workbook, reports)	Empowered

### 5. Am I eligible to enrol in this course?

Refer to the [USC Glossary of terms](#) for definitions of “pre-requisites, co-requisites and anti-requisites”.

#### 5.1. Pre-requisites

Not applicable

#### 5.2. Co-requisites

Not applicable

#### 5.3. Anti-requisites

Not applicable

#### 5.4. Specific assumed prior knowledge and skills (where applicable)

Not applicable

### 6. How am I going to be assessed?

#### 6.1. Grading Scale

Standard Grading (GRD)

High Distinction (HD), Distinction (DN), Credit (CR), Pass (PS), Fail (FL).

#### 6.2. Details of early feedback on progress

The first task (laboratory workbook) is designed to not only examine your knowledge but also to gauge your progress in understanding geological concepts and basic scientific observation skills; draft feedback on the second and third tasks will be available from the course co-ordinator prior to submission.

#### 6.3. Assessment tasks

DELIVERY MODE	TASK NO.	ASSESSMENT PRODUCT	INDIVIDUAL OR GROUP	WEIGHTING %	WHAT IS THE DURATION / LENGTH?	WHEN SHOULD I SUBMIT?	WHERE SHOULD I SUBMIT IT?
All	1	Practical / Laboratory Skills	Individual	30%	50 - 100 words per activity: total 500 words	Week 6	In Class
All	2	Written Piece	Individual	30%	1500 words	Week 8	To be Negotiated
All	3	Report	Group	40%	2500 words	Week 13	Online Submission

### All - Assessment Task 1: Laboratory workbook

<b>GOAL:</b>	To apply knowledge of geological processes and principles in practical ways and develop laboratory and problem solving skills.																
<b>PRODUCT:</b>	Practical / Laboratory Skills																
<b>FORMAT:</b>	<p>The lab workbook records activities done during practical sessions and is 30% of your assessment. (a) Laboratory Sessions wks 1,2,5,6 (20%)<sup>1</sup>. Your tutor will set you problem-solving activities related to the material covered in the learning materials and supported by the relevant chapters of the text book (total of 5 geological scenarios). .2. You discuss the problems during tutorials and write your final 50 -100- word solution on one or two pages in your workbook.<sup>3</sup>. Each solution requires evidence to support it, e.g. diagrams, maps, calculations. (b) Laboratory Sessions 3 and 4 (10%)<sup>1</sup>. In each of the Weeks 3-4, you will participate in practical sessions in which you systematically observe, describe and record information about rocks in the workbook templates. You also learn how to accurately identify and classify rocks, and analyse data about them. 2. In the rock practicals, you describe and classify 12 common rock types from the Sunshine Coast and hinterland regions. You use a tabular format and approximately 50 words per rock sample. This includes (where possible) recording the minerals that constitute them. Written feedback will be provided on the information you record in your workbook.</p>																
<b>CRITERIA:</b>	<table border="1"> <thead> <tr> <th>No.</th> <th></th> <th>Learning Outcome assessed</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>demonstrate and apply theoretical and practical knowledge of geological processes and principles to regional and global contexts</td> <td>1</td> </tr> <tr> <td>2</td> <td>use practical techniques and templates to collect and organise geological information, e.g. observing, sampling, laboratory testing, describing, recording, classifying</td> <td>2</td> </tr> <tr> <td>3</td> <td>solve problems in Earth Science by: analysing and interpreting geological information integrating your findings to identify rocks and soils, and constructing geological histories supported by evidence, e.g. diagrams, maps, calculations, observations</td> <td>3</td> </tr> <tr> <td>4</td> <td>communicate in scientific writing in the form of a workbook (terminology, units, labeling of diagrams, English expression)</td> <td>4</td> </tr> </tbody> </table>	No.		Learning Outcome assessed	1	demonstrate and apply theoretical and practical knowledge of geological processes and principles to regional and global contexts	1	2	use practical techniques and templates to collect and organise geological information, e.g. observing, sampling, laboratory testing, describing, recording, classifying	2	3	solve problems in Earth Science by: analysing and interpreting geological information integrating your findings to identify rocks and soils, and constructing geological histories supported by evidence, e.g. diagrams, maps, calculations, observations	3	4	communicate in scientific writing in the form of a workbook (terminology, units, labeling of diagrams, English expression)	4	
No.		Learning Outcome assessed															
1	demonstrate and apply theoretical and practical knowledge of geological processes and principles to regional and global contexts	1															
2	use practical techniques and templates to collect and organise geological information, e.g. observing, sampling, laboratory testing, describing, recording, classifying	2															
3	solve problems in Earth Science by: analysing and interpreting geological information integrating your findings to identify rocks and soils, and constructing geological histories supported by evidence, e.g. diagrams, maps, calculations, observations	3															
4	communicate in scientific writing in the form of a workbook (terminology, units, labeling of diagrams, English expression)	4															

### All - Assessment Task 2: Point Arkwright field workbook

<b>GOAL:</b>	To apply practical and problem solving skills to construct a geological history of a local field area and present this in the form of a field workbook.	
<b>PRODUCT:</b>	Written Piece	
<b>FORMAT:</b>	<p>You are required to complete a field workbook of approximately 1000 words on the geological features, rock types, and geological evolution of the rock platform exposed northwards for about 500 metres from Point Arkwright. Details of the format for the field workbook will be provided via Canvas. It comprises two parts: Part A : a record of your systematic observations Part B: your interpretation of the geological history in a step-by-step manner commencing with the oldest geological processes that occurred, progressing through to the processes that are occurring now. Note that because this study provides an introduction to several different aspects of geology, considerable guidance and explanation are provided about the geological features that can be observed i.e. the rock types; the manner in which they have formed; the original sedimentary depositional environment; igneous activity and deformation that occurred after the sediments hardened; current weathering and erosional processes. Substantial web-based information is provided via the course Canvas site (comprising maps, field locations, photographs, diagrams, descriptions, and explanations) so that you can revisit the field study virtually.</p>	

CRITERIA:	No.	Learning Outcome assessed
	1	use practical techniques and templates to collect and organise geological information, e.g. observation, recording, sketching <span style="float: right;">2</span>
	2	analysing and interpreting critical geological information (structures, field relationships, relative timing of events) <span style="float: right;">3</span>
	3	integrating your findings to interpret the ancient environments and construct a geological history for the visited site supported by evidence, e.g. key findings, diagrams, maps, calculations <span style="float: right;">3</span>
	4	communicate in scientific writing in the form of a field workbook (Part A and B structure, English expression, terminology, presentation) <span style="float: right;">4</span>

### All - Assessment Task 3: Final soil report

<b>GOAL:</b>	To work in groups to produce a soil report that integrates information collected about soil and sediment samples taken from the length and breadth of the Mooloolah River catchment	
<b>PRODUCT:</b>	Report	
<b>FORMAT:</b>	You work in a group of four to write a scientific report that uses class data from the analysis of soil samples taken from the Mooloolah River catchment. The samples have been analysed and described during the practical sessions, using different analytical techniques. You are provided with the class results for each sample. You are to integrate all the results to create a class dataset (e.g. in a spreadsheet or in tables). The report is to be in the standard format of Introduction, Methods, Results, and Discussion. Introduction Methods- describe the analytical techniques that you have applied to the samples. Results- present the integrated results from the practical sessions and generate a cohesive model of the surficial stratigraphy of the Mooloolah River catchment. Discussion- focus on the lithological, geochemical and biological characteristics of the soil / sediment samples and variations in these factors.	
<b>CRITERIA:</b>	No.	Learning Outcome assessed
	1	demonstrate and apply theoretical and practical knowledge of soil geological processes and principles to a local context <span style="float: right;">1</span>
	2	use practical techniques and templates to organise geological information into a dataset <span style="float: right;">2</span>
	3	solve problems in Earth Science by: analyzing and interpreting the class dataset, integrating these data to construct a stratigraphic soil map supported by evidence, e.g. diagrams, maps, calculations, observations <span style="float: right;">3</span>
	4	communicate in scientific writing in the form of a group report (report structure, English expression, terminology, presentation of soil map – labels, stratigraphic map conventions, font size) <span style="float: right;">4</span>

## 7. Directed study hours

A 12-unit course will have total of 150 learning hours which will include directed study hours (including online if required), self-directed learning and completion of assessable tasks. Directed study hours may vary by location. Student workload is calculated at 12.5 learning hours per one unit.

## 8. What resources do I need to undertake this course?

Please note: Course information, including specific information of recommended readings, learning activities, resources, weekly readings, etc. are available on the course Canvas site– Please log in as soon as possible.

## 8.1. Prescribed text(s) or course reader

Please note that you need to have regular access to the resource(s) listed below. Resources may be required or recommended.

REQUIRED?	AUTHOR	YEAR	TITLE	EDITION	PUBLISHER
Required	Marshak, S.	2015	Earth: Portrait of a Planet	6th Ed.	W.W. Norton and Co.

## 8.2. Specific requirements

Not applicable

## 9. How are risks managed in this course?

Risk assessments have been performed for all laboratory classes and a moderate level of health and safety risk exists. Moderate risks are those associated with laboratory work such as working with chemicals and hazardous substances. You will be required to undertake laboratory induction training and it is also your responsibility to review course material, search online, discuss with lecturers and peers and understand the health and safety risks associated with your specific course of study and to familiarise yourself with the University's general health and safety principles by reviewing the [online induction training for students](#), and following the instructions of the University staff

## 10. What administrative information is relevant to this course?

### 10.1. Assessment: Academic Integrity

Academic integrity is the ethical standard of university participation. It ensures that students graduate as a result of proving they are competent in their discipline. This is integral in maintaining the value of academic qualifications. Each industry has expectations and standards of the skills and knowledge within that discipline and these are reflected in assessment.

Academic integrity means that you do not engage in any activity that is considered to be academic fraud; including plagiarism, collusion or outsourcing any part of any assessment item to any other person. You are expected to be honest and ethical by completing all work yourself and indicating in your work which ideas and information were developed by you and which were taken from others. You cannot provide your assessment work to others. You are also expected to provide evidence of wide and critical reading, usually by using appropriate academic references.

In order to minimise incidents of academic fraud, this course may require that some of its assessment tasks, when submitted to Canvas, are electronically checked through Turnitin. This software allows for text comparisons to be made between your submitted assessment item and all other work to which Turnitin has access.

### 10.2. Assessment: Additional Requirements

Eligibility for Supplementary Assessment

Your eligibility for supplementary assessment in a course is dependent of the following conditions applying:

The final mark is in the percentage range 47% to 49.4%

The course is graded using the Standard Grading scale

You have not failed an assessment task in the course due to academic misconduct

### 10.3. Assessment: Submission penalties

Late submission of assessment tasks may be penalised at the following maximum rate:

- 5% (of the assessment task's identified value) per day for the first two days from the date identified as the due date for the assessment task.

- 10% (of the assessment task's identified value) for the third day - 20% (of the assessment task's identified value) for the fourth day and subsequent days up to and including seven days from the date identified as the due date for the assessment task.

- A result of zero is awarded for an assessment task submitted after seven days from the date identified as the due date for the assessment task. Weekdays and weekends are included in the calculation of days late. To request an extension you must contact your course coordinator to negotiate an outcome.

### 10.4. SafeUSC

USC is committed to a culture of respect and providing a safe and supportive environment for all members of our community. For immediate assistance on campus contact SafeUSC by phone: [07 5430 1168](tel:0754301168) or using the [SafeZone](#) app. For general enquires contact the SafeUSC team by phone [07 5456 3864](tel:0754563864) or email [safe@usc.edu.au](mailto:safe@usc.edu.au).

The SafeUSC Specialist Service is a Student Wellbeing service that provides free and confidential support to students who may have experienced or observed behaviour that could cause fear, offence or trauma. To contact the service call [07 5430 1226](tel:0754301226) or email [studentwellbeing@usc.edu.au](mailto:studentwellbeing@usc.edu.au).

## 10.5. Study help

For help with course-specific advice, for example what information to include in your assessment, you should first contact your tutor, then your course coordinator, if needed.

If you require additional assistance, the Learning Advisers are trained professionals who are ready to help you develop a wide range of academic skills. Visit the [Learning Advisers](#) web page for more information, or contact Student Central for further assistance: +61 7 5430 2890 or [studentcentral@usc.edu.au](mailto:studentcentral@usc.edu.au).

## 10.6. Wellbeing Services

Student Wellbeing provide free and confidential counselling on a wide range of personal, academic, social and psychological matters, to foster positive mental health and wellbeing for your academic success.

To book a confidential appointment go to [Student Hub](#), email [studentwellbeing@usc.edu.au](mailto:studentwellbeing@usc.edu.au) or call 07 5430 1226.

## 10.7. AccessAbility Services

Ability Advisers ensure equal access to all aspects of university life. If your studies are affected by a disability, learning disorder mental health issue, injury or illness, or you are a primary carer for someone with a disability or who is considered frail and aged, [AccessAbility Services](#) can provide access to appropriate reasonable adjustments and practical advice about the support and facilities available to you throughout the University.

To book a confidential appointment go to [Student Hub](#), email [AccessAbility@usc.edu.au](mailto:AccessAbility@usc.edu.au) or call 07 5430 2890.

## 10.8. Links to relevant University policy and procedures

For more information on Academic Learning & Teaching categories including:

- Assessment: Courses and Coursework Programs
- Review of Assessment and Final Grades
- Supplementary Assessment
- Administration of Central Examinations
- Deferred Examinations
- Student Academic Misconduct
- Students with a Disability

Visit the USC website: <https://www.usc.edu.au/explore/policies-and-procedures#academic-learning-and-teaching>

## 10.9. Student Charter

USC is committed to excellence in teaching, research and engagement in an environment that is inclusive, inspiring, safe and respectful. The [Student Charter](#) sets out what students can expect from the University, and what in turn is expected of students, to achieve these outcomes.

## 10.10. General Enquiries

### In person:

- **USC Sunshine Coast** - Student Central, Ground Floor, Building C, 90 Sippy Downs Drive, Sippy Downs
- **USC Moreton Bay** - Service Centre, Ground Floor, Foundation Building, Gympie Road, Petrie
- **USC SouthBank** - Student Central, Building A4 (SW1), 52 Merivale Street, South Brisbane
- **USC Gympie** - Student Central, 71 Cartwright Road, Gympie
- **USC Fraser Coast** - Student Central, Student Central, Building A, 161 Old Maryborough Rd, Hervey Bay
- **USC Caboolture** - Student Central, Level 1 Building J, Cnr Manley and Tallon Street, Caboolture

**Tel:** +61 7 5430 2890

**Email:** [studentcentral@usc.edu.au](mailto:studentcentral@usc.edu.au)
