

COURSE OUTLINE

SPX411 Exercise in Musculoskeletal Rehabilitation

Course Coordinator: Suzanne Broadbent (sbroadbe@usc.edu.au) **School:** School of Health and Behavioural Sciences

2022 | Session 1

USC Sunshine Coast

**BLENDED
LEARNING**

Most of your course is on campus but you may be able to do some components of this course online.

Please go to the USC website for up to date information on the teaching sessions and campuses where this course is usually offered.

1. What is this course about?

1.1. Description

This course is required for final year students in the Bachelor of Clinical Exercise Science SC346 and Bachelor of Clinical Exercise Physiology SC304 to prepare for clinical practice. You will add to your knowledge of musculoskeletal conditions and learn skills in physical examination, clinical assessment, exercise management, multidisciplinary care, and referral pathways for clients in varied care settings. You will read and apply research on musculoskeletal conditions to clinical decision-making, developing skills in evidence-based practice..

1.2. How will this course be delivered?

ACTIVITY	HOURS	BEGINNING WEEK	FREQUENCY
BLENDED LEARNING			
Tutorial/Workshop 1 – 3 week intensive, 5 days per week.	15hrs	Week 2	3 times
Laboratory 1 – 3 week intensive, 5 days per week.	10hrs	Week 2	3 times

1.3. Course Topics

- Scope of practice for clinical exercise physiologists in the musculoskeletal rehabilitation setting
- Referral pathways and the allied health framework
- Basic imaging
- The Arthritides
- Joint replacement surgeries and rehabilitation
- Lower back pain and regional pain syndromes
- Osteoporosis
- Aquatic and hydrotherapy
- The ankle, knee and hip
- The pelvis and spine
- The elbow, wrist and hand
- Physical examination and assessments for musculoskeletal conditions
-

2. What level is this course?

400 Level (Graduate)

Demonstrating coherence and breadth or depth of knowledge and skills. Independent application of knowledge and skills in unfamiliar contexts. Meeting professional requirements and AQF descriptors for the degree. May require pre-requisites where discipline specific introductory or developing knowledge or skills is necessary. Normally undertaken in the third or fourth full-time study year of an undergraduate program.

3. What is the unit value of this course?

12 units

4. How does this course contribute to my learning?

COURSE LEARNING OUTCOMES	GRADUATE QUALITIES
On successful completion of this course, you should be able to...	Completing these tasks successfully will contribute to you becoming...
1 Explain the role, skills, and scope of practice of an exercise physiologist in musculoskeletal rehabilitation, multidisciplinary care, referral, and discharge within the Australian health system.	Empowered Ethical
2 Apply knowledge in treatment and management of musculoskeletal conditions within the scope of practice of an exercise physiologist.	Knowledgeable Empowered
3 Apply clinical decision making in order to undertake physical examination, clinical assessment, exercise management, suitable for musculoskeletal rehabilitation practice.	Knowledgeable Creative and critical thinker
4 Identify musculoskeletal signs and symptoms, and contraindications to exercise, for musculoskeletal rehabilitation, before, during and after exercise, and take appropriate action	Knowledgeable Empowered
5 Access and apply scientific research and current clinical guidelines, to clinical decision-making in musculoskeletal exercise physiology practice.	Knowledgeable Creative and critical thinker

5. Am I eligible to enrol in this course?

Refer to the [USC Glossary of terms](#) for definitions of “pre-requisites, co-requisites and anti-requisites”.

5.1. Pre-requisites

SPX300 and SPX302 and SPX306 and SPX322 and SPX331 and enrolled in Program SC304 or SC346

5.2. Co-requisites

You are required to take at least one 400 level clinical placement in the current academic year.

5.3. Anti-requisites

Not applicable

5.4. Specific assumed prior knowledge and skills (where applicable)

It is assumed that you will build upon your knowledge of musculoskeletal health, conditions, diseases, and management gained in SPX302, and your skills in clinical history taking, record keeping, and evidence-based clinical decision making gained in SPX300 and SPX306.

6. How am I going to be assessed?

6.1. Grading Scale

Limited Grading (PNP)

Pass (PU), Fail (UF). All assessment tasks are required to be passed for successful completion of the course.

6.2. Details of early feedback on progress

This intensive course will provide resources and online self-managed assessments (quizzes, clinical reasoning scenarios) to provide early feedback prior to the start of the intensive and the census date. Responses to the early online assessments will be provided during Week 1 of the course. All lecture / workshop material and class resources will be provided on LMS prior to the start of the intensive with the expectation that students will familiarise themselves with the material and self-assessments. Informal individual feedback from the Course Coordinator can be provided.

6.3. Assessment tasks

DELIVERY MODE	TASK NO.	ASSESSMENT PRODUCT	INDIVIDUAL OR GROUP	WHAT IS THE DURATION / LENGTH?	WHEN SHOULD I SUBMIT?	WHERE SHOULD I SUBMIT IT?
All	1	Examination	Individual	15 minutes	Week 4	In Class
All	2	Examination	Individual	50 minutes	Week 5	In Class
All	3	Examination	Individual	120 minutes	Week 5	In Class

All - Assessment Task 1: Practical Examination 1

GOAL:	To demonstrate competency in physical examination, musculoskeletal assessment, signs and symptom identification, and exercise recommendations, using evidence-based practice and current guidelines. This task embeds understanding of the clinical history, physical examination skills required for clinical decision-making with a case study analysis of a musculoskeletal client. This examination will be of one aspect of the lower limb only (foot, ankle, shank/calf, knee or thigh).		
PRODUCT:	Examination		
FORMAT:	You will perform physical examinations on a "client", played by a student or volunteer, in response to an allocated case study of a client with musculoskeletal conditions in one regions of the body, the lower limb (foot, ankle, knee or hip). The examination will be conducted in Week 4 of Session 1, Week 2 of the intensive. You will have 24 hours to prepare for the exam. You are required to demonstrate your competency with palpation, observation, range of motion and muscular strength assessments.		
CRITERIA:	No.		Learning Outcome assessed
	1	Application of discipline knowledge, scientific evidence and clinical reasoning for clinical decision-making and demonstrated competency in physical assessment skills.	1 2 3 5
	2	Recognised evidence-based exercise prescription is demonstrated in the examination.	2 3 5
	3	Demonstrated understanding of physical examination and musculoskeletal assessment, signs and symptoms, and contraindications to exercise for musculoskeletal rehabilitation	2 3 4 5
	4	Task embeds understanding of the role, skills and scope of practice of an exercise physiologist in musculoskeletal rehabilitation	1 2 3 4 5

All - Assessment Task 2: Practical Examination 2

GOAL:	To demonstrate competency in physical examination, musculoskeletal assessments, signs and symptom identification, and exercise recommendations, using evidence-based practice and current guidelines. This task embeds demonstrated understanding of the clinical history, physical examination and exercise prescription required for clinical decision-making with a case study analysis of a musculoskeletal client. This examination will be of one aspect of two regions of the body (hip/pelvis or spine; hand, wrist, elbow or shoulder - upper body).		
PRODUCT:	Examination		
FORMAT:	You will perform physical examinations on a "client", played by a student or volunteer, in response to an allocated case study of a client with musculoskeletal conditions in two regions of the body (pelvis/spine/neck, and shoulder/upper limb). The examination will be in Week 5 of Session1, Week 3 of the intensive. You will have 24 hours to prepare for the exam. You are required to demonstrate your competency with palpation, observation, range of motion and muscular strength assessments, and to demonstrate clinical reasoning with your recommendations of rehabilitation exercises.		

CRITERIA:	No.	Learning Outcome assessed
	1	Apply clinical reasoning and critical thinking to a case study scenario. 1 2 3 4 5
	2	Demonstrate competency in conducting physical examination i.e. observation, palpation, range of motion, muscle strength and functional assessments. 2 3 4 5
	3	Identify signs and symptoms, and contraindications to exercise. 2 3 4 5
	4	Apply knowledge of the condition to review and gather evidence and information from scientific literature, including peer-reviewed research and current clinical guidelines or position stands, as part of the clinical decision-making process. 2 4 5

All - Assessment Task 3: Written Examination

GOAL:	To demonstrate critical knowledge of Exercise Physiologist scope of practice within the Australian health care system and a multi-disciplinary care framework; musculoskeletal pathophysiology, signs, symptoms; medication effects; common surgeries; referral pathway; and contraindications to exercise.	
PRODUCT:	Examination	
FORMAT:	Individual written examination. The exam will be a mixture of multiple choice and short-answer questions. This exam will be run in Week 5 of Session1, Week 3 of the intensive, in class time.	
CRITERIA:	No.	Learning Outcome assessed
	1	Knowledge of the causes, characteristics, tissue loading and physiological and biochemical mechanisms contributing to musculoskeletal conditions 2 4 5
	2	Knowledge of the EP scope of practice in the Australian health care system and a multi-disciplinary framework, and medical, surgical, pharmacological and allied health treatments of a range of musculoskeletal diseases and conditions. 1 2 5
	3	Knowledge of signs, symptoms, relevant medications and contraindications of musculoskeletal conditions before, during and after exercise, and the selection of appropriate actions during rehabilitation 2 3 4 5
	4	Application of knowledge of the specific mechanisms of action of differing modalities of rehabilitation exercises 2 3 4 5

7. Directed study hours

A 12-unit course will have total of 150 learning hours which will include directed study hours (including online if required), self-directed learning and completion of assessable tasks. Directed study hours may vary by location. Student workload is calculated at 12.5 learning hours per one unit.

8. What resources do I need to undertake this course?

Please note: Course information, including specific information of recommended readings, learning activities, resources, weekly readings, etc. are available on the course Blackboard site– Please log in as soon as possible.

8.1. Prescribed text(s) or course reader

Please note that you need to have regular access to the resource(s) listed below. Resources may be required or recommended.

REQUIRED?	AUTHOR	YEAR	TITLE	PUBLISHER
Required	Mark Hutchinson, Peter Brukner, Karim Khan, Ben Clarsen, Paul McCrory, Ann Cools, Kay Crossley, Jill Cook, Roald Bahr	2017	BRUKNER & KHAN'S CLINICAL SPORTS MEDICINE: INJURIES,	McGraw-Hill Education / Australia
Required	Hazel Clarkson	2019	Musculoskeletal Assessment	LWW

8.2. Specific requirements

Goniometers, small and medium; tape measure

9. How are risks managed in this course?

Health and safety risks for this course have been assessed as low. It is your responsibility to review course material, search online, discuss with lecturers and peers and understand the health and safety risks associated with your specific course of study and to familiarise yourself with the University's general health and safety principles by reviewing the [online induction training for students](#), and following the instructions of the University staff.

10. What administrative information is relevant to this course?

10.1. Assessment: Academic Integrity

Academic integrity is the ethical standard of university participation. It ensures that students graduate as a result of proving they are competent in their discipline. This is integral in maintaining the value of academic qualifications. Each industry has expectations and standards of the skills and knowledge within that discipline and these are reflected in assessment.

Academic integrity means that you do not engage in any activity that is considered to be academic fraud; including plagiarism, collusion or outsourcing any part of any assessment item to any other person. You are expected to be honest and ethical by completing all work yourself and indicating in your work which ideas and information were developed by you and which were taken from others. You cannot provide your assessment work to others. You are also expected to provide evidence of wide and critical reading, usually by using appropriate academic references.

In order to minimise incidents of academic fraud, this course may require that some of its assessment tasks, when submitted to Blackboard, are electronically checked through SafeAssign. This software allows for text comparisons to be made between your submitted assessment item and all other work that SafeAssign has access to.

10.2. Assessment: Additional Requirements

Limited Graded Course:

This course will be graded as Pass in a Limited Grade Course (PU) or Fail in a Limited Grade Course (UF) as per clause 4.1.3 and 4.1.4 of the Grades and Grade Point Average (GPA) - Institutional Operating Policy of the USC.

In a course eligible to use Limited Grades, all assessment items in that course are marked on a Pass/Fail basis and all assessment tasks are required to be passed for a student to successfully complete the course. Supplementary assessment is not available in courses using Limited Grades.

10.3. Assessment: Submission penalties

You must contact your Course Coordinator and provide the required documentation if you require an extension or alternate assessment. Please refer to USC Policies for deferred examinations or requests for extensions.

10.4. Study help

For help with course-specific advice, for example what information to include in your assessment, you should first contact your tutor, then your course coordinator, if needed.

If you require additional assistance, the Learning Advisers are trained professionals who are ready to help you develop a wide range of academic skills. Visit the [Learning Advisers](#) web page for more information, or contact Student Central for further assistance: +61 7 5430 2890 or studentcentral@usc.edu.au.

10.5. Wellbeing Services

Student Wellbeing provide free and confidential counselling on a wide range of personal, academic, social and psychological matters, to foster positive mental health and wellbeing for your academic success.

To book a confidential appointment go to [Student Hub](#), email studentwellbeing@usc.edu.au or call 07 5430 1226.

10.6. AccessAbility Services

Ability Advisers ensure equal access to all aspects of university life. If your studies are affected by a disability, learning disorder mental health issue, , injury or illness, or you are a primary carer for someone with a disability or who is considered frail and aged, [AccessAbility Services](#) can provide access to appropriate reasonable adjustments and practical advice about the support and facilities available to you throughout the University.

To book a confidential appointment go to [Student Hub](#), email AccessAbility@usc.edu.au or call 07 5430 2890.

10.7. Links to relevant University policy and procedures
