

Challenge your thinking and

develop

scientific knowledge and skills

Associate Degree in Science

Are you looking for a career where you can make a difference? If you are creative, enjoy solving problems, enjoy collecting and organising information, and love evaluating evidence, then a career in science is likely to suit you. This two-year program offers the perfect pathway to university to gain new skills, switch careers or simply learn more about a science field that interests you where you can gain the necessary skills needed to solve real-life problems related to many branches in science.

Fast-track your science education and gain guaranteed entry into a degree at USC. This program provides students with an alternative pathway to the Bachelor of Science and related programs at USC.

The program aims to meet the needs of students who may have a limited background in science, thus during your first year you'll learn core scientific principles such as biology and chemistry. You then have the flexibility to select an area to specialise in.

Areas you can specialise in include: Biology; Biotechnology; Chemistry; Ecology; and Mathematics.

After you complete your Associate Degree, you'll receive credit towards and direct entry into the Bachelor of Science or another degree in your chosen field of study.

Career opportunities

Depending on major chosen: research and education, industry / government.

usc.edu.au/sc201

University of the Sunshine Coast | CRICOS Provider Number: 01595D | Correct as at 16 September 2019
Note: Study options and semester of offer can vary depending on the study location. For full details, visit usc.edu.au.

LOCATION

Sunshine Coast

QTAC CODE

013101

MINIMUM SELECTION THRESHOLD

OP - 19 / Rank - 63
