

Create games

that will change
the world.

Bachelor of Serious Games

Serious games are more than 'just a game'. With new opportunities emerging in education, healthcare, marketing and more, this diverse field is one of the fastest growing and most exciting sectors of the games industry. This unique program lets you build and apply skills in game design and development to address a range of social problems – using the universal appeal of play.

- Collaborate with fellow game writers, artists, programmers and designers to produce and publish serious games that meaningfully connect with players and address global needs
- Analyse the meanings and cultural implications of gameplay and story, and use this knowledge to create emotionally rich and challenging games
- Get hands-on experience in developing for PC, smartphones and tablets, augmented reality and virtual reality

Career opportunities

Game designer, artist, programmer, writer, reviewer, interactive educator/trainer, simulation/visual design.

Scholarships

A scholarship gives you freedom to focus on your study. In 2017, USC provided more than A\$2.5 million in scholarships and bursaries to students. Find out more at usc.edu.au/scholarships.
