

# Become a **cyber forensics specialist**

## Graduate Certificate in Cyber Forensics

In this program, you'll build on your knowledge of ICT and cyber environments and become a specialist in computer forensics. Designed by industry experts, you'll learn across a range of digital applications and be exposed to contemporary cyber scenarios.

Continue towards master's level with the Master in Cyber Investigation and Forensics.

In this program you will:

- Understand the legal and ethical issues associated with cyber forensics and investigations.
- Develop relevant, specialist knowledge and skills across a range of digital applications and cyber scenarios.
- Develop competencies within a holistic framework of professionalism, collaboration and critical self-reflective practice.
- Learn from key experts and innovators in the field.

### Admission requirements

To be considered for admission, candidates would normally be required to possess an undergraduate degree from a recognised higher education institution with a technology related field, or successful completion of the Graduate Certificate in Cyber Security.

### Careers

Digital evidence practitioner, computer forensics specialist
