## ROAD SAFETY TIPS

# Pedestrians

- Be sure the vehicle stops before you step onto a crossing, even if you have the right of way or the green 'walk' sign is displayed.
- Making eye contact is a great way to be sure the driver has seen you before you cross a road.
- If you are crossing the road early in the morning, late in the afternoon, or at night, remember it will be difficult for drivers to see you. Assume they haven't seen you before stepping onto the road.
- Put your phone down and your head up before you cross the road – this way you will notice if a driver does not give way to you.
