

Enrol in your courses and select your class times

1. Log in to USC Central: usccentral.usc.edu.au

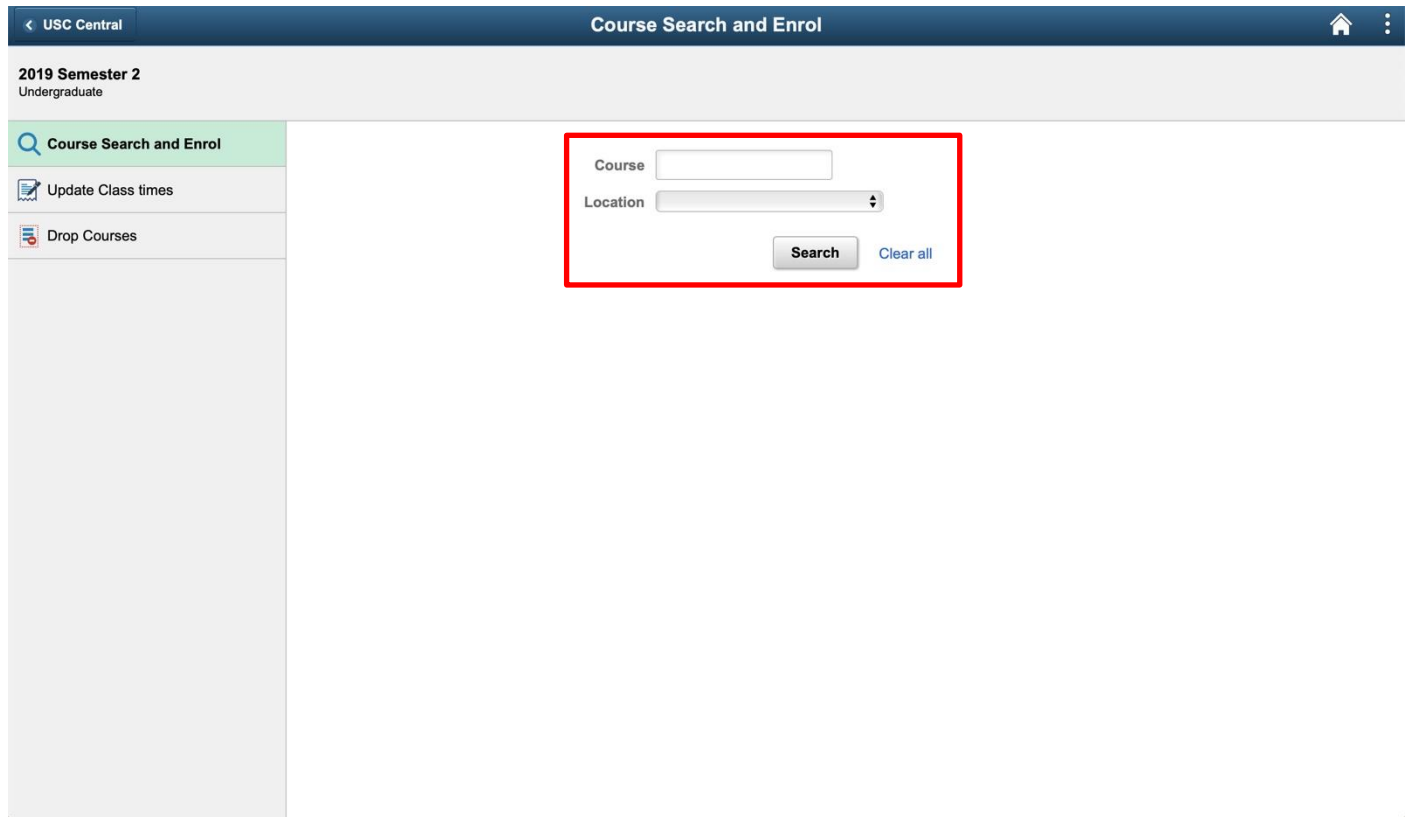

2. Select **Manage Enrolment**

Enrol in your courses and select your class times

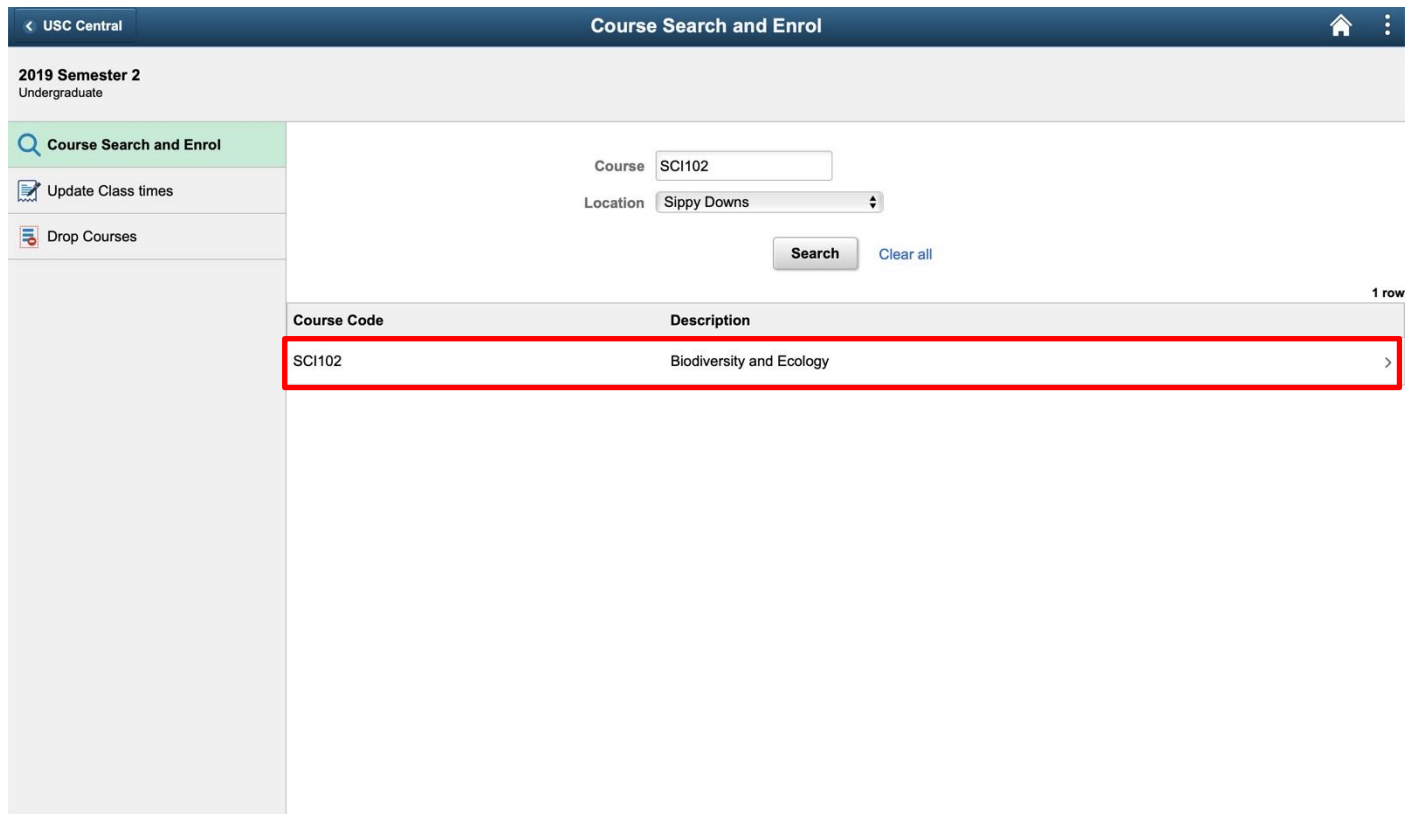

3. Search for courses by entering the course code (e.g. COR109) and study location. Select **Search**.

Note: you may have to choose from available enrolment terms (e.g. Semester 1) before you can search for courses.

The screenshot shows the 'Course Search and Enrol' interface. At the top, there is a navigation bar with 'USC Central' and 'Course Search and Enrol'. Below this, the semester is set to '2019 Semester 2 Undergraduate'. A sidebar on the left contains 'Course Search and Enrol', 'Update Class times', and 'Drop Courses'. The main area features a search form with a red border around the 'Course' and 'Location' input fields. The 'Course' field is empty, and the 'Location' dropdown is also empty. Below the fields are 'Search' and 'Clear all' buttons.

4. Select the course.

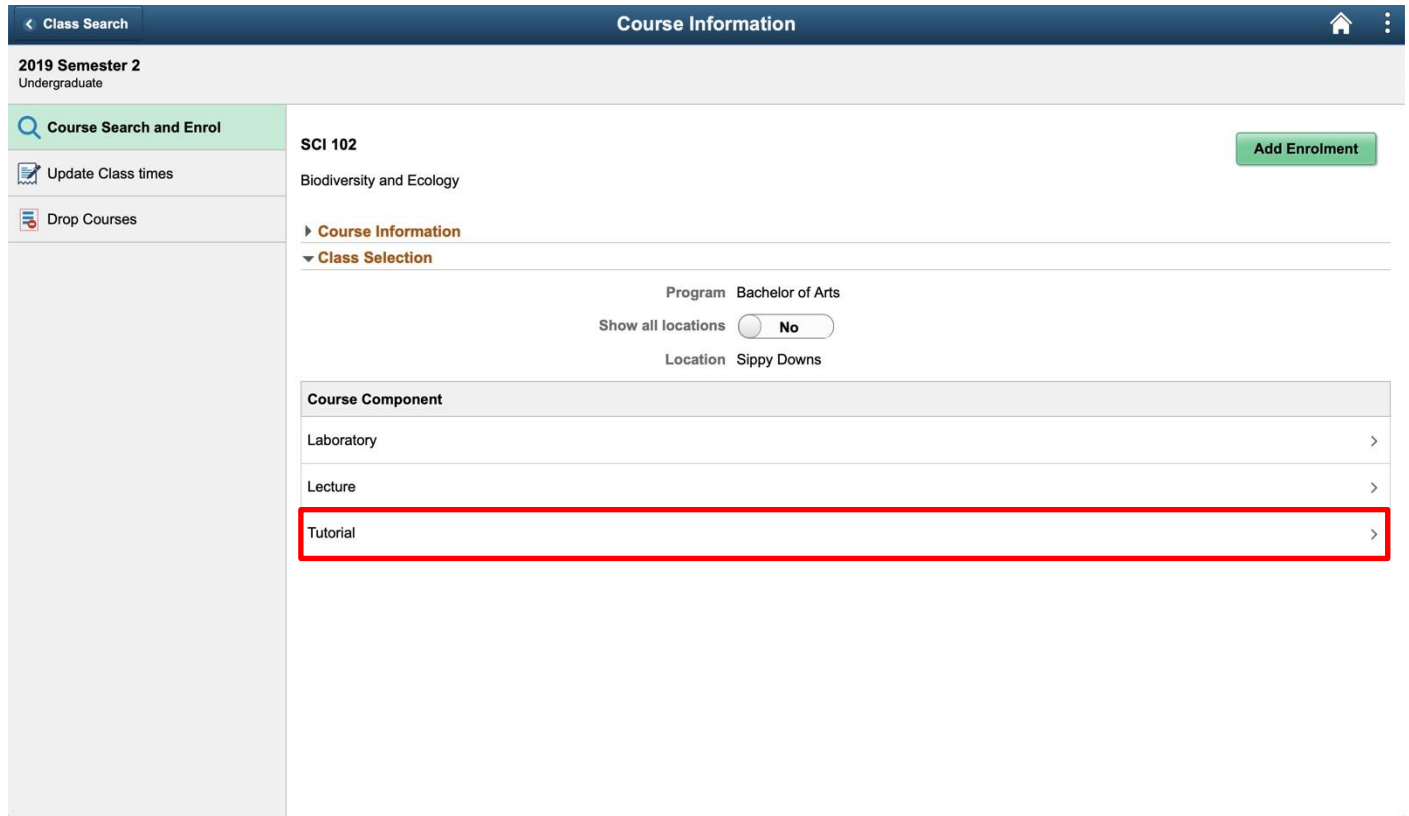

The screenshot shows the same 'Course Search and Enrol' interface, but now with search results. The 'Course' field contains 'SCI102' and the 'Location' dropdown is set to 'Sippy Downs'. The 'Search' button is highlighted. Below the search form, a table displays the results. The table has two columns: 'Course Code' and 'Description'. A single row is shown, with 'SCI102' in the 'Course Code' column and 'Biodiversity and Ecology' in the 'Description' column. A red border highlights this row. The text '1 row' is visible in the top right corner of the table area.

Course Code	Description
SCI102	Biodiversity and Ecology

Enrol in your courses and select your class times

- You will need to select your preferred class time for each available Course Component (e.g. Laboratory, Lecture, Tutorial, Workshop).
