Design the technologies of the future. Every day, technology becomes more essential to the way we live, work and play. This creates huge demand for people who understand the 'how and why' of computing, and have the skills to design, build and manage the technologies of the future.

In this program you will:

- Future-proof your career with strong core skills in programming, software development, artificial intelligence, big data, and data science/analysis
- Work with Android, Cloud, JavaScript, Java, Python and C/C++ technologies
- Choose to specialise in mobile computing or cyber security
- Start building a portfolio of software and design projects from your first year of study
- Complete industry certifications and placements designed to get you job-ready

Career opportunities

- Cyber security
- Cloud and mobile technologies
- Project Management
- Workplace Learning
- Engineering
