

# Graduate Certificate in Mental Health and Neuroscience

LOCATION

START

Online

Semester 1, Semester 2

Understand the changing landscape of mental health. This online program is designed to provide a comprehensive understanding of the rapidly evolving field of mental health, with a focus on the latest research and treatment options across a range of mental and substance-use disorders.

This program is also suitable as a pathway to higher degree research, or to the Graduate Diploma in Mental Health and Neuroscience.

In this program you will:

- Study through USC's Thompson Institute and benefit from its unique integration of world-class research, clinical services, education and advocacy
- Gain knowledge of cutting-edge applied neuroscience that has the power to transform mental health practice across a wide range of disciplines
- Study other important areas of focus in the program, including youth mental health, advanced neuroimaging, and suicide prevention

Career opportunities

- Emerging research fields
- Mental health
- Neuroscience
- Pathway to higher degree research
- Policy
- Public Health
- Education
- Working with vulnerable people
- Working with young people
- Apply mental health understanding in current career

Duration

1 year

Part-time only

Indicative 2024 fees

A\$4,472 (CSP)
